<b>List of Figures</b> .....	<b>vii</b>
<b>List of Tables</b> .....	<b>xi</b>
<b>Foreword</b> .....	<b>xiii</b>
<b>Acknowledgments</b> .....	<b>xiv</b>
<b>Preface</b> .....	<b>xv</b>
<b>1. Introduction</b> .....	<b>1</b>
1.1 Fibre Channel Topologies .....	1
1.2 What Is Arbitrated Loop? .....	2
1.3 Port Types .....	7
1.4 Loop Applications .....	7
1.5 Chapter Summary .....	21
<b>2. Loop Concepts</b> .....	<b>25</b>
2.1 Repeater Function .....	26
2.2 Loop Circuits .....	30
2.3 Loop Protocols .....	32
2.4 Addressing .....	35
2.5 Participating and Nonparticipating Ports .....	39
2.6 FL_Port Support .....	39
2.7 Public and Private Loops and Ports .....	40
2.8 Classes of Service .....	42
2.9 Chapter Summary .....	44
<b>3. Ordered Sets</b> .....	<b>49</b>
3.1 Transmission Word Relationship .....	49
3.2 Frame Delimiters .....	50
3.3 Primitive Signals .....	51
3.4 Primitive Sequences .....	54
3.5 Chapter Summary .....	57
<b>4. Loop Port State Machine</b> .....	<b>59</b>
4.1 Loop Port State Machine Overview .....	59
4.2 Chapter Summary .....	66
<b>5. Loop Initialization</b> .....	<b>67</b>
5.1 Reasons for Initialization .....	69
5.2 Loop Initialization Select Master (LISM) Procedure .....	72
5.3 AL_PA Assignment .....	76
5.4 Building a Positional Map of the Loop .....	83
5.5 Closing the Loop Initialization Process .....	85
5.6 Post Loop Initialization Processing .....	85
5.7 Minimizing the Impact of Initialization .....	86
5.8 Multiple Ports Initializing .....	87

5.9	Initializing State .....	88
5.10	Old-Port State .....	90
5.11	Open Initializing (Open-Init) State .....	91
5.12	Loop Initialization Trace .....	93
5.13	Chapter Summary .....	99
<b>6.</b>	<b>Monitoring State .....</b>	<b>103</b>
6.1	Loop State Machine Operation .....	103
6.2	Chapter Summary .....	107
<b>7.</b>	<b>Arbitration and Fairness .....</b>	<b>109</b>
7.1	Fill Word Substitution .....	109
7.2	The Arbitration Process .....	111
7.3	Arbitration Scenarios .....	114
7.4	Withdrawn Arbitration .....	124
7.5	Access Fairness .....	125
7.6	Using AL_PA and Fairness to Set Priority .....	127
7.7	AL_PA Order on the Loop .....	127
7.8	LPSM Arbitrating State .....	128
7.9	LPSM Arbitration Won State .....	131
7.10	Chapter Summary .....	133
<b>8.</b>	<b>Flow Control .....</b>	<b>135</b>
8.1	End-to-End Flow Control .....	136
8.2	Buffer-to-Buffer Flow Control .....	136
8.3	Chapter Summary .....	148
<b>9.</b>	<b>Opening a Loop Circuit .....</b>	<b>151</b>
9.1	Open Point-to-Point (OPNy) .....	151
9.2	Open Replicate (OPNr) .....	152
9.3	Selecting the Destination Port .....	157
9.4	Open Failures .....	158
9.5	Open State .....	159
9.6	Opened State .....	162
9.7	Chapter Summary .....	165
<b>10.</b>	<b>Closing the Loop Circuit .....</b>	<b>167</b>
10.1	Using Dynamic Half Duplex During Close .....	169
10.2	Using Transfer .....	169
10.3	Transmitted Close State .....	175
10.4	Received Close State .....	177
10.5	Transfer State .....	179
10.6	Chapter Summary .....	181
<b>11.</b>	<b>Frame Transmission .....</b>	<b>183</b>
11.1	General Design Considerations .....	183
11.2	Basic Transmit Operation .....	184
11.3	Basic Receive Operation .....	188
11.4	Full-Duplex Operation .....	190
11.5	Half-Duplex Operation .....	197

11.6	Chapter Summary .....	201
<b>12.</b>	<b>SCSI-3 FCP Commands .....</b>	<b>203</b>
12.1	FCP Use of the Exchange .....	203
12.2	FCP Information Units .....	203
12.3	Class-3 FCP Frames .....	208
12.4	Loop Tenancies .....	211
12.5	FCP Control Command Scenarios .....	213
12.6	Write-Type Command Scenarios .....	215
12.7	Read-Type Command Scenarios .....	222
12.8	Summary .....	226
<b>13.</b>	<b>Performance .....</b>	<b>229</b>
13.1	Factors Affecting Loop Performance .....	229
13.2	Loop Tenancies .....	233
13.3	Performance Estimation .....	234
13.4	Arbitration Wait Time .....	236
13.5	FCP Command Performance Examples .....	240
13.6	Performance Summary .....	257
13.7	Chapter Summary .....	260
<b>14.</b>	<b>Errors .....</b>	<b>261</b>
14.1	Loop Timers and Timeouts .....	261
14.2	Link Errors .....	261
14.3	Loop Protocol Errors .....	262
14.4	Link, Frame, and Sequence Errors .....	268
<b>15.</b>	<b>Arbitrated Loop Hubs .....</b>	<b>275</b>
15.1	Insertion Modes of Hubs .....	276
15.2	Removal Modes of Hubs .....	278
15.3	Sophisticated Hubs .....	278
15.4	Hub Summary .....	279
15.5	Chapter Summary .....	280
<b>16.</b>	<b>High-Availability Loops .....</b>	<b>281</b>
16.1	Single-Loop Configurations .....	281
16.2	Port Bypassing .....	282
16.3	Placement and Control of the Bypass Function .....	285
16.4	Dual-Loop Configurations .....	286
16.5	Concurrent Maintenance and Hot Swapping .....	291
16.6	Summary .....	293
16.7	Chapter Summary .....	294
<b>17.</b>	<b>PLDA Technical Report .....</b>	<b>295</b>
17.1	What Is a Profile? .....	295
17.2	PLDA Background .....	295
17.3	Relevant ANSI Standards .....	296
17.4	Exchange and Sequence Management .....	299
17.5	SCSI Operation .....	303
17.6	PLDA Defined Functions .....	306

17.7	Error Detection and Recovery .....	311
17.8	PLDA and Standards Compliance .....	314
17.9	Loop Tenancy Management .....	317
17.10	PLDA Summary .....	318
17.11	Chapter Summary .....	319
<b>A.</b>	<b>LPSM State Tables .....</b>	<b>321</b>
1.1	Symbols .....	322
A.2	Monitoring State .....	323
A.3	Arbitrating State .....	327
A.4	Arbitration Won State .....	330
A.5	Open State .....	332
A.6	Opened State .....	335
A.7	Transmitted Close State .....	338
A.8	Received Close State .....	341
A.9	Transfer State .....	344
A.10	Initializing State .....	346
A.11	Open-Init State .....	348
A.12	Old-Port State .....	351
<b>B.</b>	<b>SCSI FCP Command Traces .....</b>	<b>353</b>
B.1	Write Command .....	353
B.2	Read Command .....	359
<b>C.</b>	<b>FC-AL-2 Changes .....</b>	<b>365</b>
<b>D.</b>	<b>Notes on FC-AL-1 .....</b>	<b>371</b>
D.1	Notes on Version 4.5 .....	371
D.2	Notes on Version 5.2 .....	372
	<b>Glossary .....</b>	<b>373</b>
	<b>Index .....</b>	<b>377</b>
